I was born and live in Cape Town, South Africa. I have passion for modeling, love fashion, art, creativity, and being in front of the camera. I approach my assignments with a good work ethic, and always strive for improvement. I am reliable, punctual, work well with others, and open to creative experimentation like advertising or acting.

Outside of my modeling job I am an ordinary girl, easy to get along with, and fun to be around. I have completed my studies in Information Technology Solutions Development. Besides my modeling assignments, I work on a freelance basis doing computer programming and working on various IT projects.
